Sawtimber volumes are based on the Girard Form Class Volume Tables utilizing the International 1/4 Inch Log Rule. Sawtimber volumes for blocks 1, 6 and 7 were 100% tallied. Sawtimber volumes for blocks 2, 3, 4, 5 and 8 were Variable Plot Prism Cruised. Pulpwood volumes for blocks 1, 6 and 7 were 1% tallied. Pulpwood volumes for blocks 2, 3, 4, 5 and 8 were Variable Plot Prism Cruised.

The species, quality, and block volumes may vary from said estimates. Volumes and quality are not guaranteed. No volume adjustments will be made. Bidder should bid on his own estimate of merchantable volume and log quality. No logs will be scaled.

Topwood smaller than 4 inches diameter inside bark on cutting block(s) 6 and 7 is reserved. Whole tree harvesting/skidding will be allowed on block(s) 1,2,3,4,5 & 8. (Not just around log landings or on main skid trails). Tops may be spread on the main skid trail if they provide the benefit of erosion control. Tops should be dropped where the operator can drag next skid through to scatter the tops. Failure to follow these guidelines will require all trees to be topped where they fall. Permission will be granted on a block by block basis. Topwood is the upper portion of a felled tree not normally merchantable for any product other than fuelwood because of size, taper, or other defect.
