## Ecosystem/Terrain

- Area slopes from roughly 1300 feet up to 2400 feet elevation from the bottom of Clark Run Gorge.

- The terrain is very rocky with exposures of Loyalhanna limestone and offers some views of beautiful waterfalls along Clark Run.
- The mature deciduous forest consists of mixed oaks and other hardwoods.
- Area also is known to harbor PA Plant Species of Concern.

## Wildlife

*The beautiful Clark Run supports a wild population of brook trout.*

- The natural area provides habitat for the state-threatened Allegheny woodrat.

- The natural area supports many colorful species of warblers.

*Black bears can be found in the natural area.*

- Game species like deer, turkeys, and bears can be found in the natural area and may be hunted during appropriate seasons.

## Access

- US219, US322, and Route 403 are major roads in the area.
- Rager Mountain Road accesses the natural area to the north.
- Rager Mountain and Clark Run trails are two loop trails that traverse the natural area.
- Parking is available at the end of Rager Mountain Road and at the Clark Run trailhead.

*Hikers beware; timber rattlesnakes are found in the natural area and favor south-facing, rocky outcrops.*
