INVASIVE HITCHHIKERS Fact Sheet # 11

What Campers Need To Know!

Invasive species are taking over parks and natural areas throughout Pennsylvania, making camping difficult and damaging valuable habitat. Luckily campers can play a critical role in slowing the spread of invasives.

"Invasive species" are nonnative plants and animals that can cause harm to the economy, environment and human health.

Invasive plants tend to grow quickly and thickly, potentially

blocking trails. This makes it more difficult for people to camp and enjoy the outdoors.

Mile-a-minute, for example, is a vine that can grow up to a foot per day! It can quickly make trails impassable with its painful spines (see photo below).

Invasive species are also a concern to campers because they can ruin the beauty of Pennsylvania landscapes and lower biodiversity (the variety of living things in an area).

We need biodiversity to maintain healthy habitats.

Plus it's simply more interesting and exciting to camp in a landscape full of different shrubs, trees, flowers and grasses, rather than in a boring field of the same invasive plant. But that is exactly what could happen if an invasive species appears... all other species, including wildlife, may be chased out!

Make A Difference!

Now that you know why invasive species are a concern, what can you do to help minimize their spread? Luckily there are many small, easy steps you can take to keep invasives in check.

- Know how to identify some of the more common invasive species in your area, so you can avoid camping near them. To learn more, visit www.dcnr.state.pa.us/forestry/plants/invasiveplants/index.htm
- Stick to designated trails and campsites instead of creating your own.
- Clean clothing, shoes, pets, and tents before entering a new area to remove hitchhiking seeds and plant parts (bag it and throw it in the trash).
- Do not move firewood! Buy it locally. This will help prevent dangerous insects like emerald ash borer from spreading further. Go to www.emeraldashborer.info for more details.
- Volunteer to help prevent and control invasive species. Contact your local state park or forest office, conservation district, watershed group or campground to get involved.
