Bureau of Forestry Mission Statement31

Preface

This directory is a compilation of Pennsylvania's primary wood processors. It includes the primary wood-processing companies that participated in a recent Timber Product Output Survey. It is a voluntary listing of the companies wishing to be included in the directory. As such, this directory is not a comprehensive listing of every primary wood-processing company in Pennsylvania.

It is a goal of the partners to conduct the survey periodically in hopes of continually adding companies and refining the directory. Of the 418 companies known to be in operation during the initial survey, 203 companies returned surveys and 188 agreed to be listed in this directory. Companies were located in 61 of Pennsylvania's 67 counties.

The Pennsylvania DCNR Bureau of Forestry, conducted the survey throughout 2017 to provide information on the amount of timber harvested and processed by Pennsylvania's forest products industry in 2016. The survey also provided general information on the employment force and overall production capacity of Pennsylvania's forest products industry during 2016. The Bureau's 35 Service Foresters started with several listings of primary wood processors and mills. They received training to canvass their assigned counties. Starting early in 2017, they began visiting sawmills and other companies in the counties where they work to learn more about Pennsylvania's wood products industry.

A primary wood processor is one that actually cuts into a log or a bolt (a half log) to produce a primary wood product, whether that is a board, veneer, cant, chip, shaving or sawdust. These companies include sawmills, pallet mills, scrag mills, whole-tree chippers, firewood processors, and any other company receiving and processing roundwood into a primary wood product. Also, for the survey and this directory, log buyers & brokers exporting logs out of the U.S. were included.

Roundwood includes sawlogs for lumber; veneer logs and bolts; cooperage logs and bolts; pulpwood for paper; poletimber for fuelwood chips; logs for posts, poles, pilings; shaving/excelsior bolts; mine-prop timber; logs for railroad ties, pallet cants and scrag mills; cabin logs; and many more examples.

Acknowledgments

The Bureau of Forestry thanks all the businesses that shared information for this directory.

Special thanks go to the PA Forest Products Association, PA Hardwoods Development Council, and Penn State University's Department of Ecosystem Science and Management for their contribution and guidance.

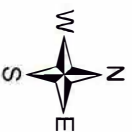

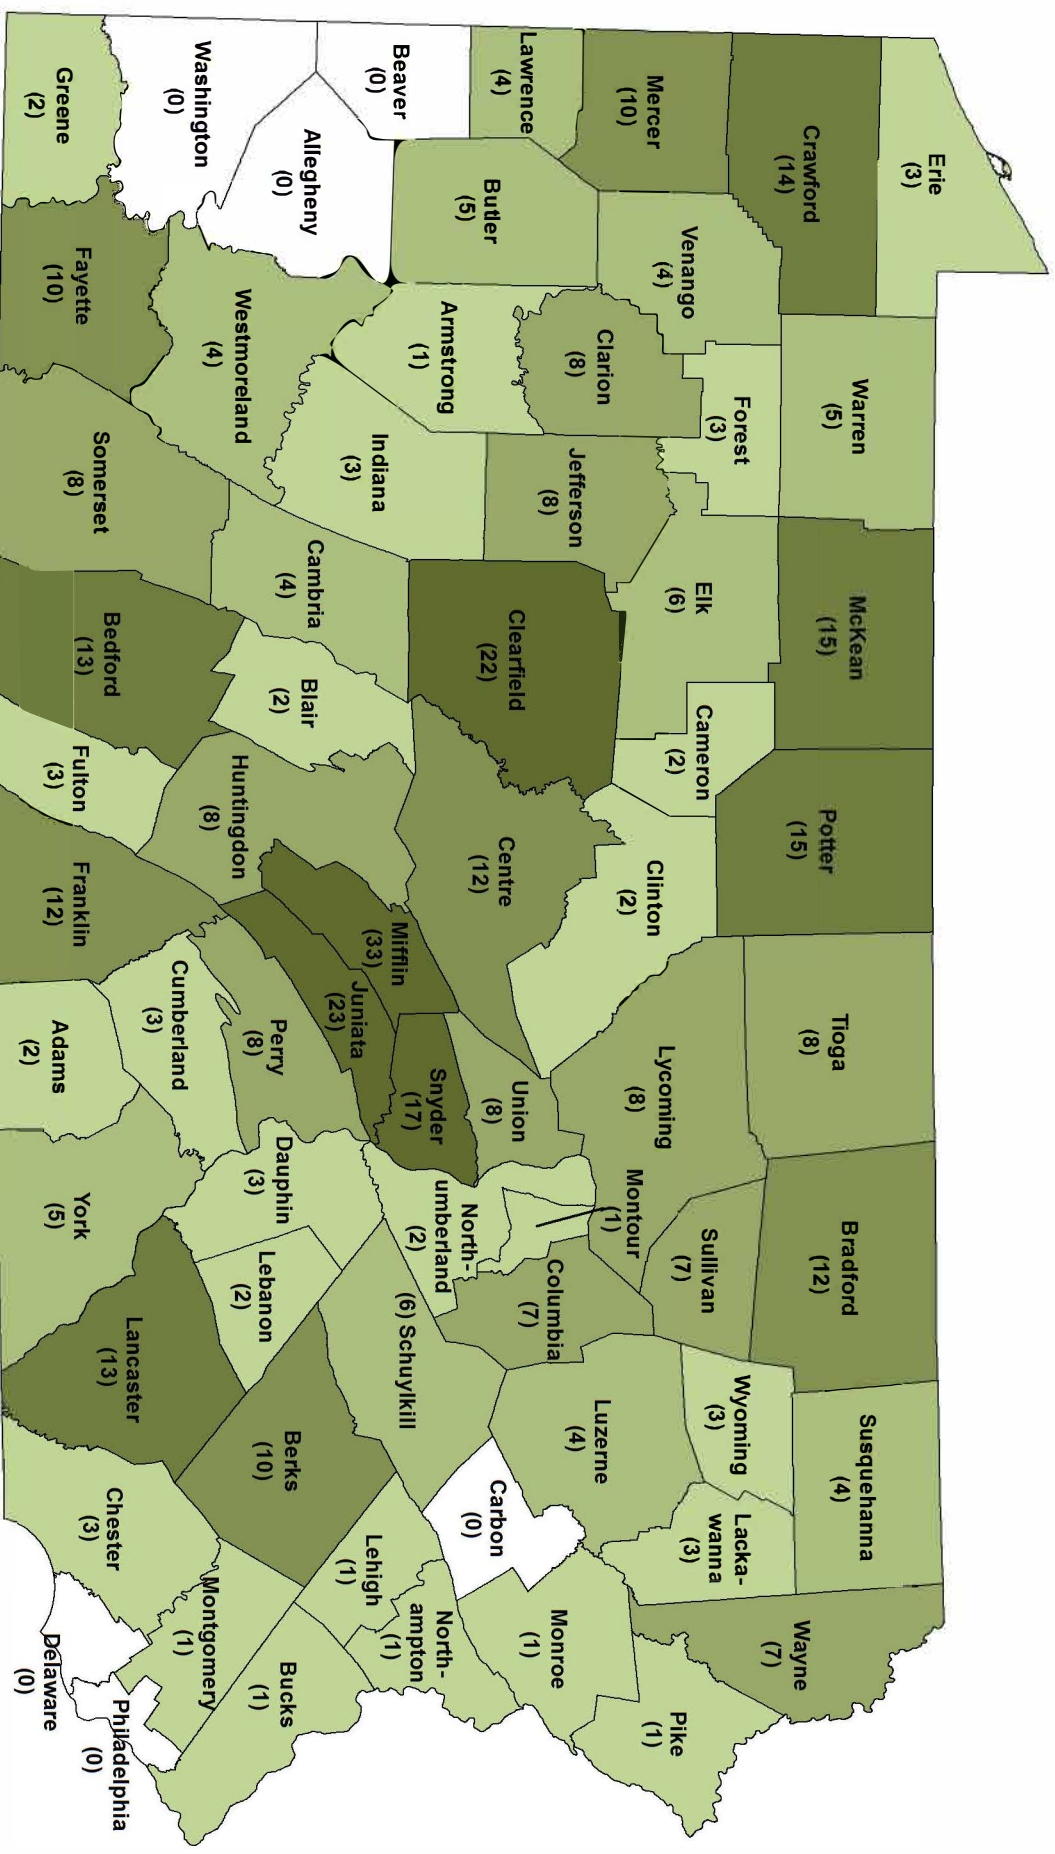

Special thanks go to the Bureau's thirty-five Service Foresters who gathered and reported information for this directory.

Future Participation

The Bureau of Forestry plans to conduct Timber Product Output Surveys every three years. Other primary wood processing companies are encouraged to participate in these TPO surveys. If a company was not contacted in 2017 and would like to participate in the next survey, or if errors are found, or if other suggestions can be made to improve the directory; please send contact information and suggestions to the Bureau's Silviculture Section.

Pennsylvania Department of Conservation & Natural Resources

Bureau of Forestry

Mission

"The mission of the Bureau of Forestry is to ensure the long-term health, viability and productivity of the Commonwealth's forests and to conserve native wild plants."

"Pennsylvania's public natural resources are the common property of all the people, including generations yet to come. As trustee of these resources, the Commonwealth shall conserve and maintain them for the benefit of all the people."

-- Article 1, Section 27 of the Pennsylvania Constitution
