

General Information

Pennsylvania contains about 17 million acres of forestland. Of this total, over two million acres are in the state forest system, which is publicly owned and managed by the Department of Conservation and Natural Resources, Bureau of Forestry. The Forbes State Forest comprises about 60,000 acres located in Westmoreland, Somerset, and Fayette Counties.

State Forests provide clean water, recreation, habitat for plants and animals, places to enjoy the tranquility of nature, and produce some of the most valuable timber in the world.

Mountain Streams Area

This area contains a mixture of hardwood forest, with old farm fields reverting to forest. Most of the headwaters to Indian Creek are contained within this tract. Remnants from old railroad grades including the Indian Creek Valley Railroad and Blair Brothers Railroad can be found in this area. The Blair Brothers line ran in Kregar, and was used to service the old Piper and Blair Brothers coal mines, as well as the Blair Lumber Company. Tram road grades can also be found here. These roads were used to haul logs from the forest by horse-drawn railroad cars and small locomotives.

Fishing

Indian Creek between Route 381 parking lot and Hunter Lane is a delayed harvest area. This stretch is open to fishing year-round in accordance with PFBC Rules and Regulations.

Camp Run is a PFBC designated Wild Brook Trout Enhancement Area. It is open to fishing in accordance with PFBC Rules and Regulations.
